

Red Rock Canyon State Park - Last Chance Canyon Addition - *DRAFT* - Management Zone/Environmental Effects Matrix

	Proposed Focused-Use Zone	Proposed Primitive Zone	Proposed Sensitive Resource Zone
	(BROWN)	(TAN)	(L.T. GREEN)
			<div>Cultural Preserve (RUST)</div> <div>Natural Preserve (DK. GREEN)</div>
Zone Description	This zone consists of areas receiving the highest intensity of visitor use.	This zone is primarily unmodified, with the exception of existing low or minimal impact activities.	This zone protects sensitive resources including previously designated historic district and establishes the Scenic Canyon/Nightmare Gulch Natural Preserve recommended in the original General Plan. Proposed new natural and cultural preserves would occur in this zone.
Experience	Visitors will have the opportunity to enjoy and appreciate natural, scenic, and cultural settings with a moderate level of contact with others. The area may have a moderate level of use.	Visitors will have the opportunity to experience the natural environment and setting with a moderate to low level of use and contact with others.	Visitors will experience low-level use, offering minimal contact with others and maximum opportunities for solitude & tranquility. As an area of low-level use, visitors will also have maximum opportunity for experiencing indigenous sights, smells, and sounds.
Management	Consistent with State Park designation and the Department's resource management directives.	Consistent with State Park designation and the Department's resource management directives.	Consistent with State Park designation, the Department's Resource management directives, Cultural and Natural Preserve designation, and National Register Archaeological District.
	Managed for high quality recreational experiences.	Managed for a balance between the need for recreation and the protection of resources. Increased emphasis on sustainable ecosystems and maintenance of biodiversity.	Managed to maintain and protect the natural character including the conditions of solitude, biological diversity, and cultural resources.
	Maintain & protect the natural character including sensitive watersheds, wetlands and creeks.	Avoid, minimize, or mitigate impacts on natural and cultural resources.	Habitat manipulation only permitted to preserve the unique species or characteristics which constitute the basis of the preserve.
	Prescribe sustainable design and maintenance practices.	Prescribe sustainable maintenance practices.	Habitat manipulation only permitted to preserve the unique species or characteristics which constitute the basis of the preserve.
	Avoid, minimize, monitor, and/or mitigate impacts on natural and cultural resources.	Disturbed areas will be restored to natural conditions.	Disturbed areas will be restored to natural conditions.
	Highest level of staff presence & signage (more controlled management).	Minimal signage to reflect education, orientation and guidance of visitors.	Minimal signage to provide education, orientation and guidance of visitors.
	Avoid, minimize, or mitigate impacts to scenic vistas and night skies.	Preserve scenic vistas and night skies.	Preserve scenic vistas and night skies.
